Oracle Web Server Administration
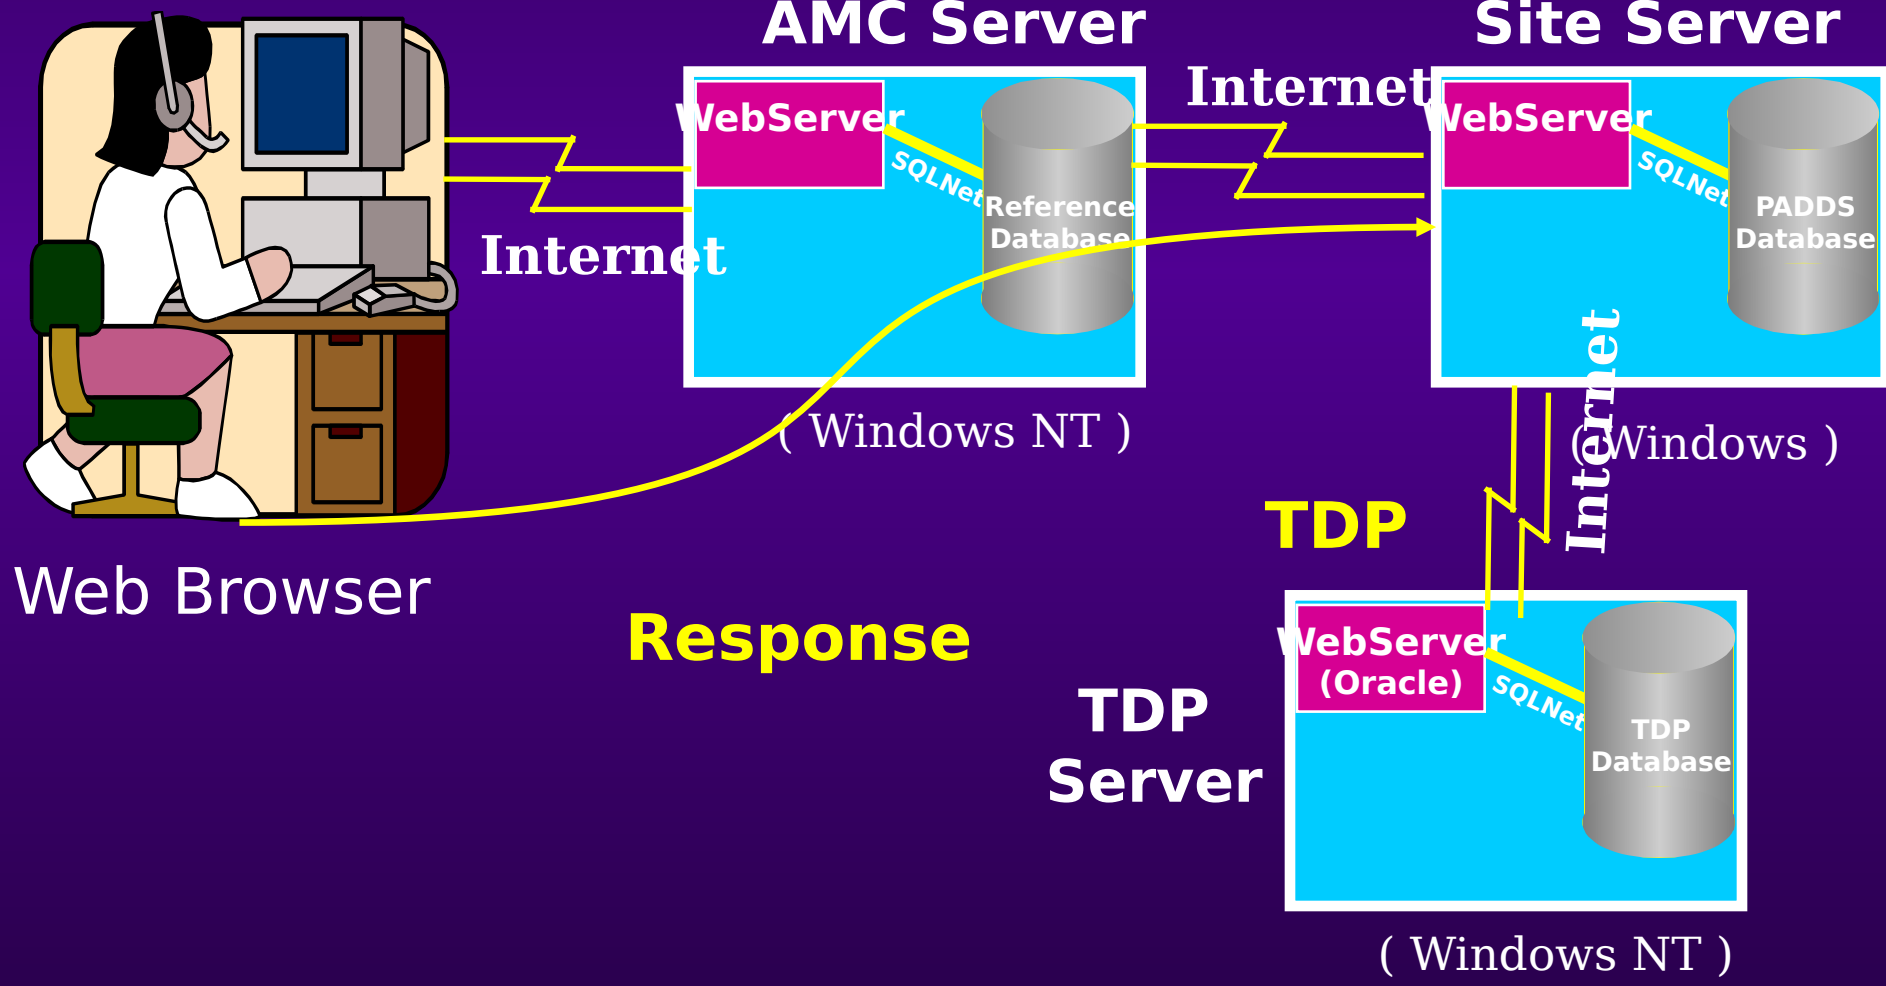
Welcome to the Oracle Web Server Administration form.
From here, you can create a new Oracle Web Server to run on your machine, by selecting the Create New Oracle Web Server link, or you can modify or delete existing Oracle Web Servers on your server, by following the proper link below.
Below are listed the Oracle Web Servers on this machine. Each Web Server is uniquely identified by the network port on which it is configured to run. The Web Servers below are listed by their port number, along with the directory
configuration file resides. Configuration files follow the naming convention of
START
STOP

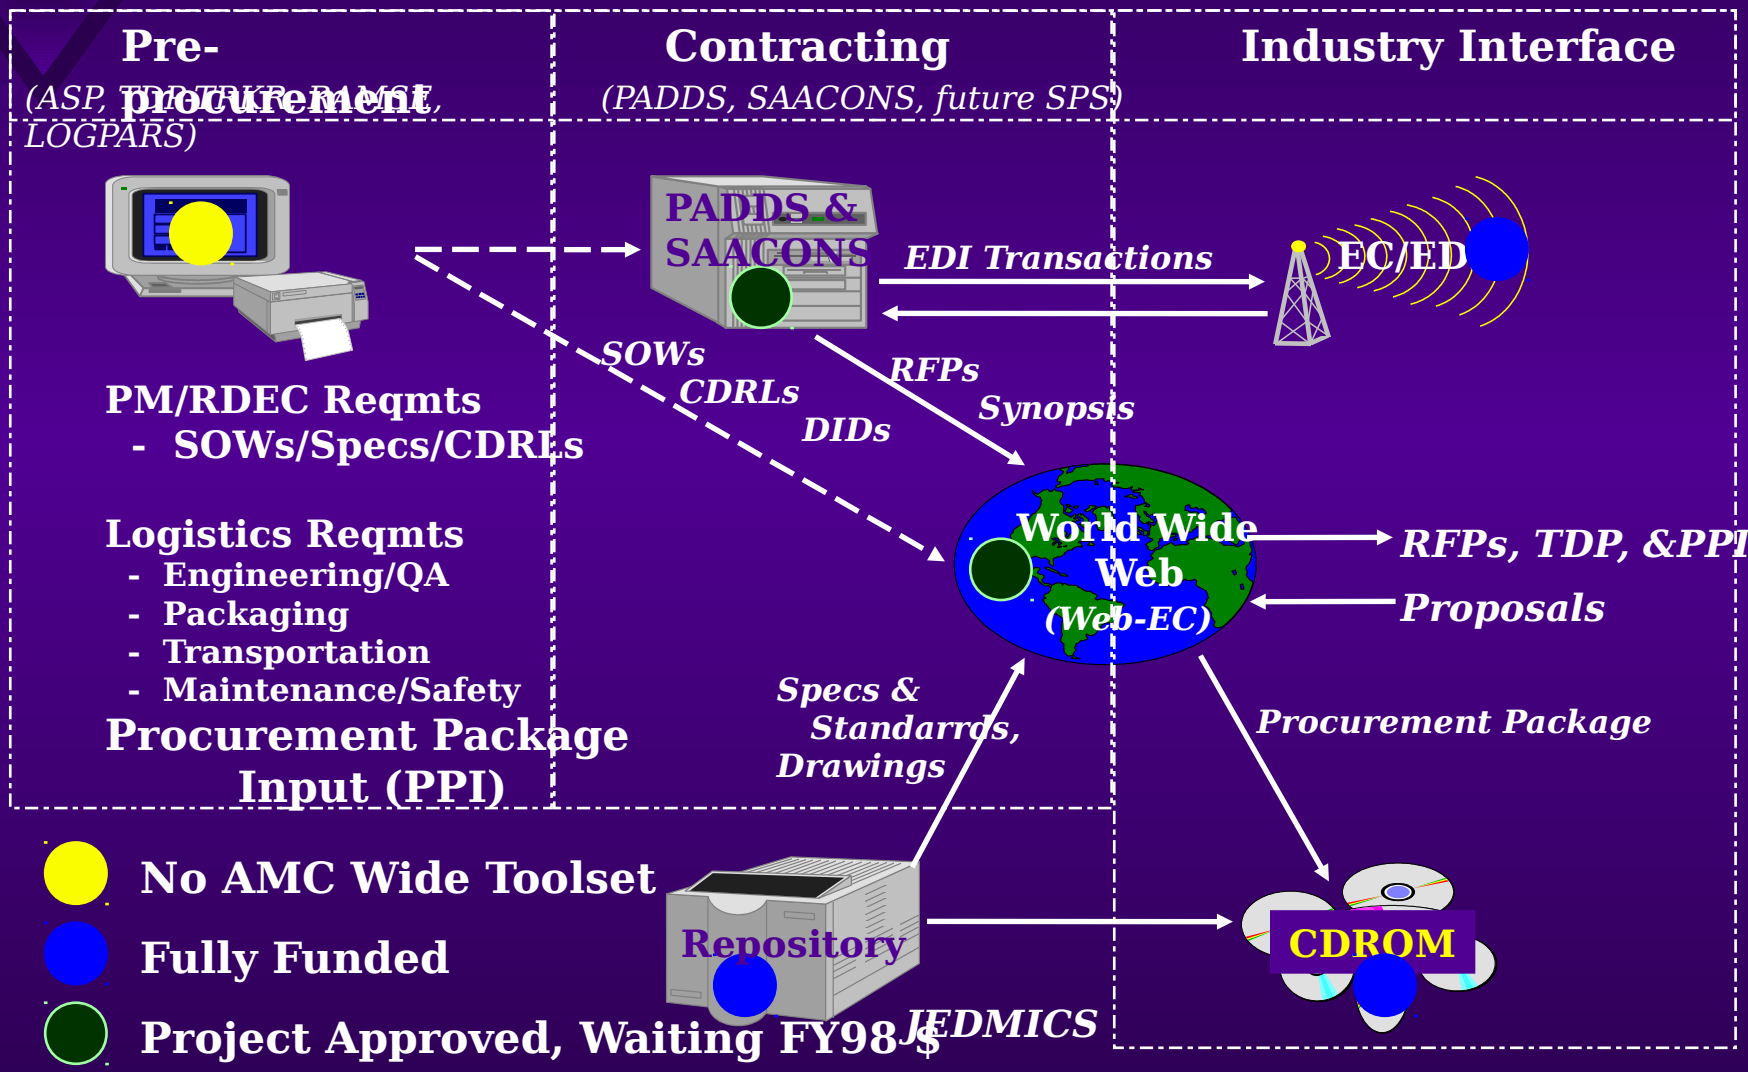
Web Electronic Commerce

- Paperfree acquisition
- Modular approach guarantees portability
  - Based on Standard Procurement EDI Data
- Direct transaction feeds, e.g. PADDS/SAACONS
- Linked to TDPs
- Incorporates Bid Response
- Search Engine with direct links to buying sites
- Accessed from the AMC Acquisition Business Web site

Web Electronic Commerce Architecture



(Acquisition "Toolset" - Process Flow View)



Multi Party Partnership

- **AMC - Reference Database**
  - Security
- **AMCOM CIC - Interfaces**
  - Bid Response
- **EDMS - Security**
  - Technical Data
- **MSCs - Acquisition Home Pages**

Web Electronic Commerce Next Steps

- Work security issues
- Incorporate complex acquisitions
  - ➨ Expand Bid Response Module
- Link to the CCR
- Expand to other Army users

Goal: Provide a total COTS end-to-end Business S
